Recalls by Year

NHTSA Vehicle Recalls, 1966 to 2025

Vehicle recalls per year have risen about 4.3x since the early 1990s and 1.8x since the early 2000s.

NOTE: Advisory flags only appear from 2012 onward. That's when NHTSA started recording them, not a real jump in danger.

Year

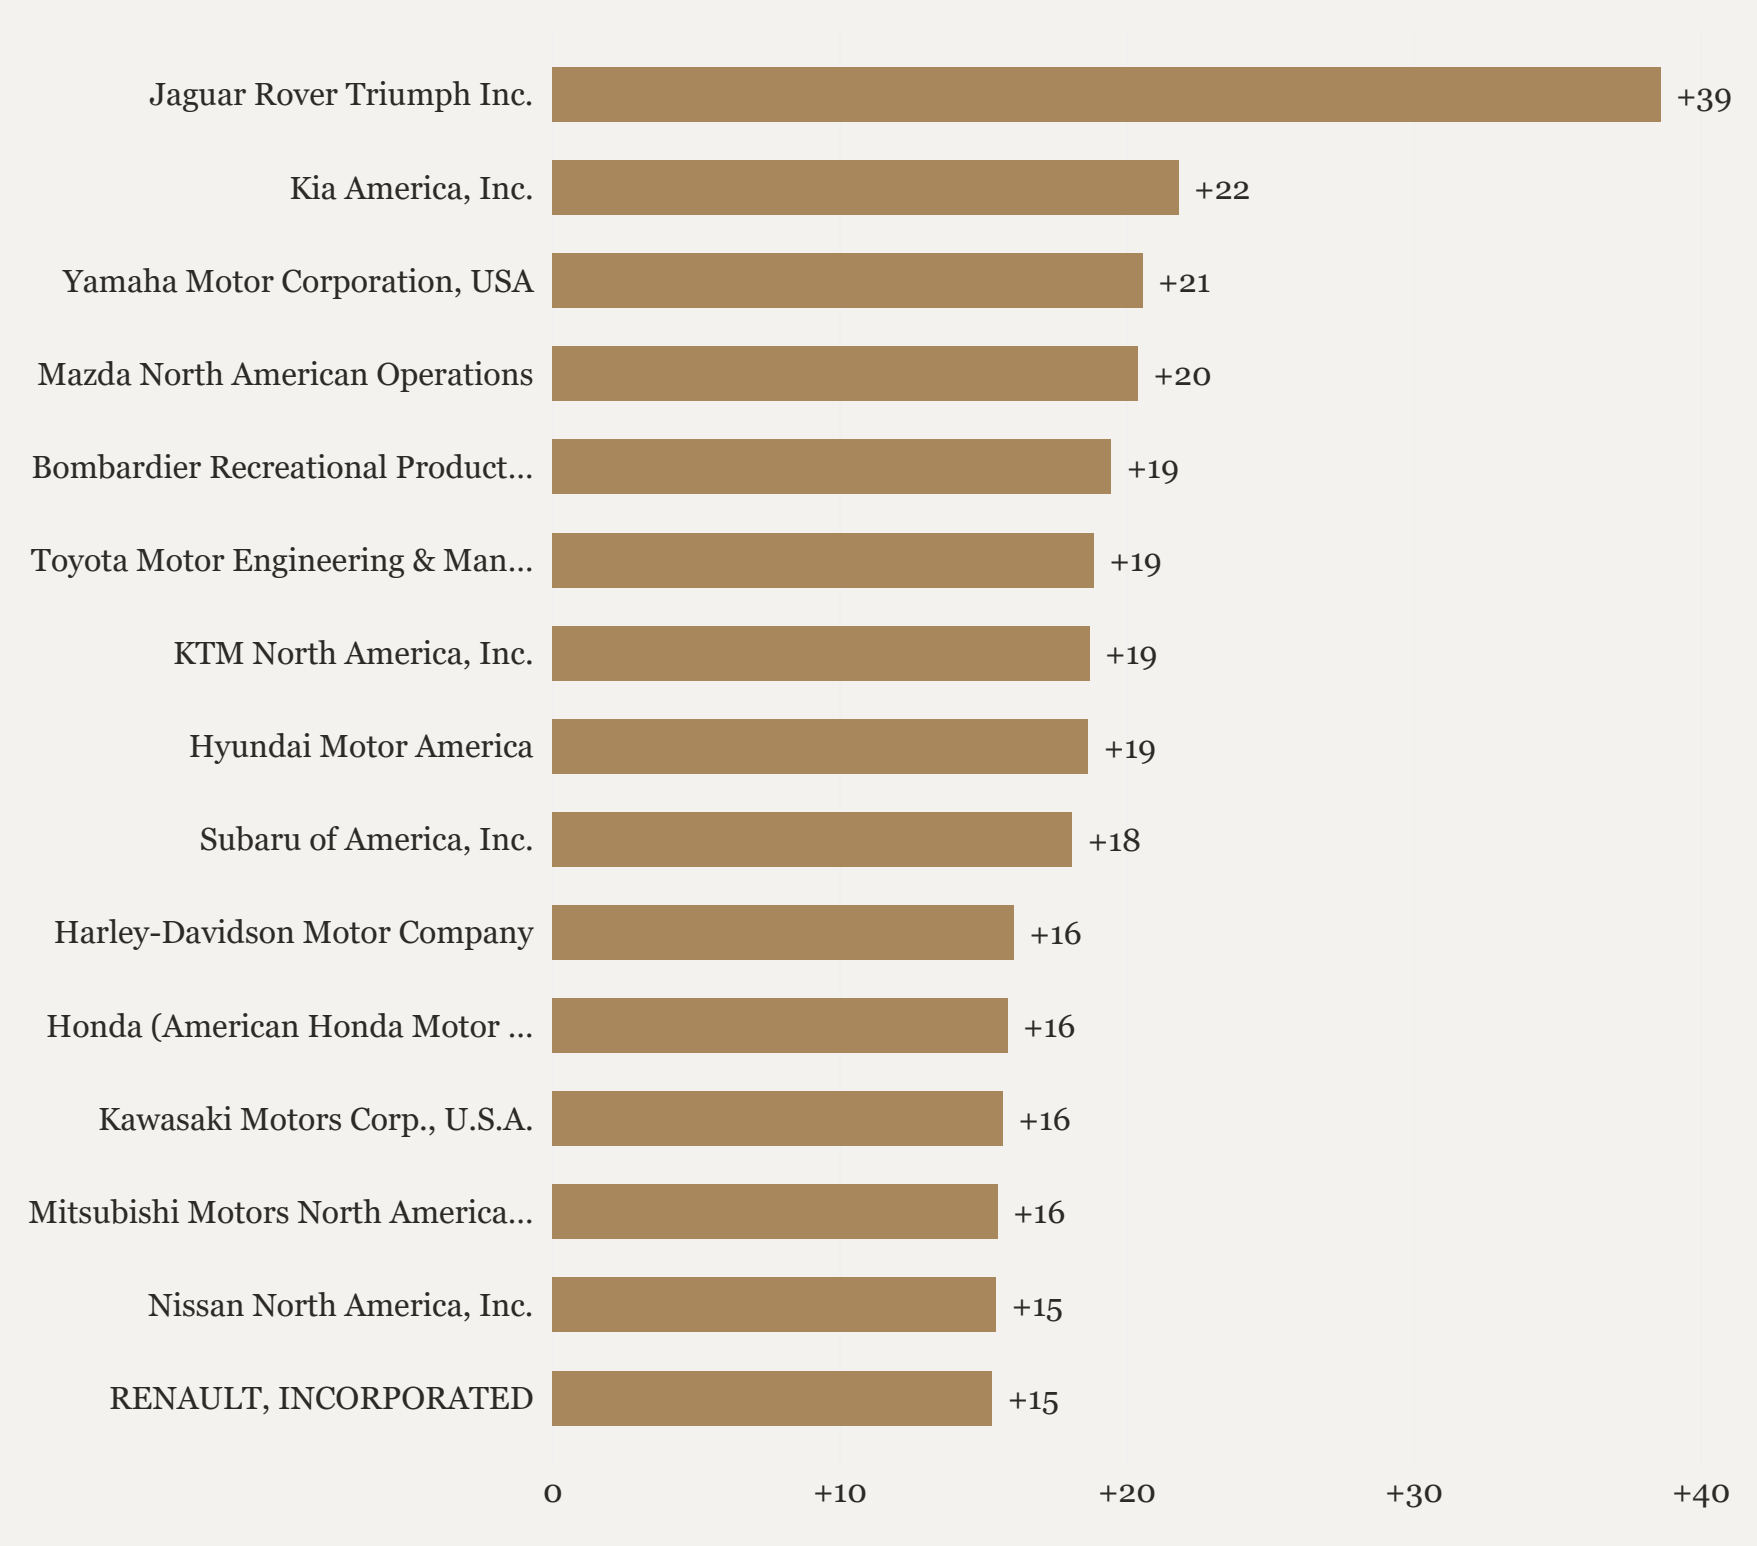

Manufacturer Ranking: Vehicle Recalls, 1966 to 2025

Kia and Mazda have the most severe recall records among carmakers. Ford, GM and Chrysler issue the most recalls but none make the top 15. More recalls doesn't mean more dangerous ones.

Average point difference from a typical recall

#1 Jaguar Rover Triumph's 72 recalls all date from 1967 to 1990. Yamaha, KTM and Bombardier are motorcycle and powersports makers.
